

Gabriel Bello

Full Stack Developer

I am an electronic engineer in telecommunications with over 15 years of experience in optical networks, as well as installation, configuration, and support of Unix and Linux servers. Recently, I have successfully transitioned to web programming after completing a 6-month FullStack training program at Academlo, where I achieved outstanding performance. Now, I am eager to apply my technical skills and experience in software development to contribute to the success of a dynamic and creative web development team.
